

Fire Station No. 5 Replacement

1301 Turk Street, San Francisco, CA 94115

Project Description

This seismic improvement for Fire Station No. 5 (originally built in 1956) is part of the Earthquake Safety and Emergency Response (ESER 2010) bond work to renovate or replace selected fire stations. The ESER 2010 bond passed with 79.4% approval of San Francisco voters in June 2010.

On behalf of the San Francisco Fire Department, San Francisco Public Works has hired Alten Construction as the general contractor for the project. The proposed project includes the demolition of the existing building and construction of a new seismically safe fire station with new building and life safety systems, ADA accessibility including an elevator, and other related improvements.

The project is designed to achieve LEED Gold rating for New Construction. Alten Construction is scheduled to mobilize on site on April 25th, 2017. The project will take approximately 18 months to complete the work. Fire Station No. 5 will close during construction. Fire service will be uninterrupted during construction, relying on the deployment of apparatus and personnel from nearby stations.

Impacts and Restrictions

Alten Construction anticipates deliveries and site activities between the hours of 7:00 a.m. and 3:30 p.m., Monday through Friday. No evening or weekend work is currently scheduled. Should such work be scheduled in future, Public Works will disseminate advance notice as feasible. According to the City's Department of Building Inspection, construction may occur during the hours of 7:00 a.m. to 8:00 p.m., seven days a week, including holidays.

The demolition and construction will likely result in noise and dust commonly associated with such work. Noisy demolition is not scheduled to begin prior to 8:00 a.m. Site safety and dust control measures will be instituted and strictly followed. Pedestrian traffic will be maintained through a safety barricade.

Impact to street parking is anticipated. Street cleaning restrictions will still be in effect.

Thank you for your patience and cooperation during construction. **For future project updates, please subscribe to our Construction Newsletter by visiting sfearthquakesafety.org/firestation5.**

START: April 25, 2017

END: Fall 2018
