Fire Station No. 16 Replacement

ESER 2010
This project is a part of the Earthquake Safety and Emergency Response (ESER) Bond which passed with the approval of 79 percent of voters in June 2010. The general obligation bond authorized $64 million for upgrading fire stations. To date, the ESER 2010 Neighborhood Fire Station portfolio has completed 74 projects at 20 stations.

Fire Station No. 16 Replacement is a major project in the ESER portfolio. The existing fire station will be torn down and replaced with a new fire station that will have improved seismic performance to conform with current building codes for essential facilities. In addition, the modern replacement station will seek to achieve the environmental sustainability standards of LEED Gold Certification.

Fire Station 16 Information
2251 Greenwich Street (at Fillmore Street)
Year built: 1938
Second level additions: 1955
Roof renovation and interior remodel: 1994
Construction budget: $10.1 million

Construction Schedule
