Traffic Company & Forensic Services Division
Construction Progress at 1995 Evans Avenue
I. Highlights and accomplishments

- EFWS Pump Station 2 construction continues
- FS35 structural strengthening of the north apron complete; elevator install, glass/glazing and exterior doors complete; relocation of JCDecaux public restroom on Embarcadero complete
- Final Completion issued for renovations at Richmond, Northern, Taraval, Park, and Ingleside Police Stations (ESER 2014); Substantial Completion issued for Bayview and Tenderloin
- TCFSD exterior envelope & installation of elevators complete. Interior work underway.

II. Upcoming milestones

- FS16 financial closeout in May 2021
- FS35 completion of PG&E work; providing permanent power
- Final Completion for MEP upgrades at Bayview and Tenderloin in May 2021 (ESER 2014)
- TCFSD complete interior build-out and public right-of-way improvements; TCO anticipated in July 2021

III. Bond sales and appropriations

- For ESER 2010, the City has issued six bond sales totaling $412.3M; $415M has been appropriated, inclusive of (partial) interest-earned. Additional interest earned of $500K (final amount TBD) is expected.
- For ESER 2014, the City has issued three bond sales and appropriated a total of $397M.
- For ESER 2020, the City has issued one bond sale and appropriated a total of $80.5M

IV. Risks, issues or concerns on budget, scope or schedules

- COVID-19 has produced a variety of impacts that inhibit or influence differently the normal conduct of construction sites, affecting project cost:
  - Costly enhanced cleaning and related protocols' assurance
  - Site safety protocols that impair productivity
  - Materials and equipment supply line continuity
  - Work force availability
Public Safety Building (PSB 2010 – $230.5M*)

Recent accomplishments

- Partial project savings have been reallocated to other bond components; remaining project savings are under review to determine future reallocation/uses

- Remaining Balance: $0.04
- Future Bond Sale: $0.04

**Complete**
Traffic Company & Forensic Services Division (TCFSD 2014 – $170.5M*)

Recent accomplishments

- Exterior envelope complete
- Interior build-out continues
- Permanent power installation completed in late March 2021
- Gas service installation by PG&E completed April 2021
- Placed concrete slab at the motorcycle garage
- 99% of construction work has been bought; remaining bid packages are minor in scope, excluding security fences & gates and FF&E procurement

Upcoming milestones

- Complete interior
- Begin public right-of-way improvements
- Resolution of existing facility conflicts by PG&E
- Temporary Certificate of Occupancy (TCO) anticipated in July 2021
- Procure FF&E
- Complete move-management strategy to phase-move SFPD

Budget status

*Includes estimated COI savings ($1.1M) and partial PSB funding ($7.2M)

Additional Funding Sources:

Project is in funding deficit of $17.3M – potential sources:
- ESER2010 Interest: $500K
- ESER2010 PSB savings: $7.2M
- ESER2014 Estimated COI Savings: $1M
- Deferred Projects: $8.645M

*Current Phase: Construction
Completion Date: Fall 2021
Police Facilities (PF 2014 – $29.6M)

Recent accomplishments
- Park & Ingleside Renovations – Final Completion issued 3/3/21
- Northern, Richmond, Taraval Renovations – Final Completion issued on 3/26/21
- MEP Pkg 2 (Bayview & Tenderloin) – Substantial Completion issued on 3/3/21

Upcoming milestones
- Northern, Richmond, Taraval Renovations – Construction contract closeout
- Park & Ingleside Renovations – Construction contract closeout
- MEP Pkg 2 (Bayview & Tenderloin) – Final Completion anticipated to be issued in May 2021

Police Stations & Support Facilities
(PF 2020 – $119.2M)

Recent accomplishments
• Preliminary project orientation with Supervisor Asha Safai for Ingleside Police Station
• MOU between PW and SFPD provided for review

Upcoming milestones
• Assembling team members to begin project initiation and planning efforts across five projects identified for this program component:
  o Ingleside District Police Station Replacement
  o Lake Merced Police Pistol Range Replacement
  o Taraval District Police Station Seismic Retrofit
  o Mission District Police Station Structural Improvement
  o Surge Police Facility Construction

Current Phase: Pre-Planning
Completion Date: July 2025
Neighborhood Fire Stations (NFS 2010 – $72.6M)

Recent accomplishments
- Fire Station 5 – USGBC awarded LEED Gold Certification for New Construction in December 2020

Upcoming milestones
- App Bay Doors (10 FSs) – National Garage Door – Financial closeout
- Fire Station 16 – Financial closeout

Emergency Firefighting Water System (EFWS 2020 – $151.2M)

Recent accomplishments

- **19th Avenue Pipeline** – Install new 36-inch diameter Potable Emergency Firefighting Water System (PEFWS) pipeline
- **Vicente Street Pipeline** – Install new 36-inch diameter PEFWS pipeline.

Upcoming milestones

- **Vicente Street Pipeline** – Construction contract award expected April 2021

**Budget status**

Current Phase: Various
Completion Date: December 2026

[Budget status chart showing $151.2M and various segments of the budget.]
Recent accomplishments

• Developed facility programming requirements
• Draft concept plan showing new program enhancements and layout plan
• Worked on external circulation development
• Received initial feedback from City Planning on the project HRE

Upcoming milestones

• Develop and complete the planning and design agreement with Public Works
• Continue environmental review process with the Planning Dept
• Initiate work on site testing and destructive testing
• Develop a public outreach program to share project plans

(i) PeopleSoft financial data thru Q3 FY2021
(ii) ESER 2020 first bond sale occurred end of March 2021; final par transaction amount was $80.715M (payment for net Underwriter's Discount Fee of $178K occurred prior to deposit of bond proceeds to the City)
The Earthquake Safety and Emergency Response (ESER 2010) Bond Program consists of three components: the Public Safety Building (PSB), the Neighborhood Fire Stations (NFS), and the Auxiliary Water Supply System (AWSS). The SFPUC manages the AWSS component and Public Works manages the remaining components. To date, there have been no upsets that would seriously compromise any client department’s expectations for the successful delivery of any project.

The ESER 2014 Bond Program is comprised of five components: Office of the Chief Medical Examiner (OCME); Traffic Control & Forensic Services Division (TCFSD); Neighborhood Fire Stations (NFS); Emergency Firefighting Water System (EFWS); and Police Facilities (PF). The SFPUC manages the EFWS component and Public Works manages the remaining components.

The ESER 2020 Bond Program is comprised of five components: Emergency Firefighting Water System; Neighborhood Fire Stations & Support Facilities; District Police Stations & Support Facilities; Disaster Response Facilities; and 9-1-1 Call Center. The SFPUC manages the EFWS component, the Recreation and Parks Department manages the Disaster Response Facilities component, and Public Works manages the remaining components. The following is a brief summary of each component.

Public Safety Building (2010)
The Public Safety Building (PSB) provides a new venue for the SFPD Headquarters – effectively the command-and-control administration of the City’s police department—including the relocation of Southern District Station and a new Mission Bay Fire Station. Included in the project is the reuse of Fire Station #30, which serves as a multi-purpose facility for the Fire Department and the community. Historic resource consultants have determined that the existing fire station is eligible for the National Register of Historic Places. Consistent with the Mission Bay SEIR Addendum No. 7, Mitigation Measures, Item D.02, this facility was retained and reused in a manner that preserves its historic integrity. The other components of the project were designed to be respectful of the historic integrity of the existing fire station.

The ESER 2010 bond will renovate or replace selected fire stations to provide improved safety and healthy work environment for the firefighters. The selected stations are determined according to their state of condition and their importance for achieving the most effective delivery of fire suppression and emergency medical services possible.

The ESER 2014 bond program is anticipated to continue the work of ESER 2010 bond, categorizing projects according to the three categories of Focused Scope, Comprehensive, and Seismic. The ESER 2014 bond program will continue to address identified and prioritized needs at Fire Stations that were previously not addressed under the 2010 program. Significant improvements will have been completed at all SFFD Fire Stations at the conclusion of the 2010 and 2014 bond programs.

The ESER 2020 bond is comprised of two projects: new construction of the Fire Training Facility (FTF) and Fire Station 7. The Fire Department currently conducts trainings for recruits and existing personnel at two facilities: one on Treasure Island and a smaller one in the Mission District. Plans are underway for a development project on the island that obligates the relocation of the training facility and departure from Treasure Island by December 2026. This new facility will be the single largest project in the NFS component of the ESER 2020 bond. The projected cost of the facility and the expected cost of the site to be acquired by the City may require a phased approach. Other projects will be considered once the funding requirement for the new Fire Training Facility is determined.

The Emergency Firefighting Water System includes a high-pressure water system and cistern water storage for fire suppression in the City. The Emergency Firefighting Water System is vital for protecting against the loss of life, homes, and businesses from fire following an earthquake. It is also used for the suppression of non-earthquake multiple-alarm fires.

The Earthquake Safety and Emergency Response Bonds of 2010, 2014, and 2020 will seismically improve the EFWS cisterns, pipelines, tunnels and physical plant.
**Office of Chief Medical Examiner (2014)**
The existing OCME is located at the Hall of Justice (HOJ) at 850 Bryant Street. The HOJ is over 50 years old and seismically deficient. In the event of a major earthquake, this building is not expected to be operational. This project is part of a larger strategy to replace the Hall of Justice established in the City’s 10-Year Capital Plan as the Justice Facilities Improvement Program (JFIP).

The $65M project will relocate the OCME to One Newhall Street in the India Basin Industrial Park. The new facility will house approximately 50 employees who are organized into the four units of the OCME: Field Investigations, Medical/Autopsy, Laboratory, and Administration.

**SFPD Traffic Company and Forensic Service Division (TCFSD) (2014)**
The SFPD Traffic Company (TC) is currently located at the Hall of Justice (HOJ) at 850 Bryant Street. The SFPD Forensic Services Division (FSD) is currently located at two facilities. The FSD Administration, Crime Scene Investigations, and Identification units, with approximately 60 employees, are housed at HOJ. The FSD Crime Lab, with approximately 25 employees, is housed at Building 606 in the Hunters Point Shipyard.

The project will relocate the TC & FSD to a site located at 1995 Evans Avenue, Mission Bay, San Francisco. The project is being developed to support 109 employees for 2020 FSD demand within approximately 70,000 sf and allows for a potential future expansion if required. The SFPD – TC will support 94 employees for 2020 demand within 16,500 sf plus 8100 sf motorcycle parking garage. The Real Estate Division occupies approximately 2,100 sf with up to 7 full time employees plus meeting space to accommodate an additional 6 visiting staff. With common spaces the building is approximately 103,600 sf.

**Police Facilities (2014 & 2020)**
Under ESER 2014, this component includes various *Focused Scope and Comprehensive* facility upgrade projects at 12 police facilities – 9 district stations and 3 support facilities–across the City. The work scopes are derived from a series of onsite investigations, observations, and professional evaluations of different building systems that include mechanical, electrical, plumbing, fire protection, and structural safety. It also includes assessments of seismic strength, building envelope (i.e. integrity of roof, doors, windows, and walls), ADA accessibility requirements, as well as other site improvements that ensure safety and security.

The project’s overall budget is $30M, the cost to address all Police Facilities building issues is estimated as above $250M, and therefore project priorities are selected per recommendations by the Citywide Capital Plan, including state of condition and the importance of particular improvements in achieving the most effective delivery of police services possible. The building deficiencies that inhibit public access, or that may compromise occupant life safety, and others that pertain to code compliance, will get the first priority.

The assessments and evaluations performed will inform the work to be performed under ESER 2020. Five projects have been preliminarily identified for inclusion under the ESER 2020 Program.

1. Ingleside District Police Station Replacement
2. Taraval District Police Station Seismic Upgrade
3. Police Surge Facility Construction (an enabling project for Ingleside and Taraval)
4. Lake Merced Police Pistol Range Replacement
5. Mission District Police Station Structural Improvement
Disaster Response Facilities (2020)
Kezar Pavilion is located in the southeast corner of Golden Gate Park at 755 Stanyan Street. The building resides in what is known as the Kezar Triangle which is comprised primarily of the pavilion, a large parking lot to the south and the athletic stadium to the west. The pavilion gymnasium was constructed in 1926 with various additions added over the years between 1935 through 1964. The pavilion is currently used as a regional recreation space for indoor athletics and serves as the home of the Recreation and Parks Department's Park Ranger program. The facility has had extensive structural evaluation studies conducted and the building is considered the highest seismic hazard in the department’s building portfolio.

The proposed project will include a complete renovation of the gym more functional with an improved seismic rating of 1.5. The space will be reconfigured to optimize usable space so that it can function as both a multi-use recreation hub but also be converted to an emergency response facility at the appropriate time of need. The old addition add-ons will be demolished and replaced with a new three story, attached building, one floor being set below grade. This new structure will continue to house the Park Rangers, but it will also include a new multi-use recreation space and new showers, restrooms and locker rooms. Like the gym, this new building addition will also be designed to function as a city asset for disaster response needs.

9-1-1 Call Center (2020)
The 9-1-1 Call Center is operated and managed by the Department of Emergency Management. It is located at the City’s Emergency Operations Center (EOC) at 1011 Turk Street in the Western Addition neighborhood and houses public safety dispatchers who answer all calls made to 9-1-1. These dispatchers are the initial point of contact for all of San Francisco’s first responders, 24 hours a day. They serve the communications hub that dispatches first responders to the scene of accidents, crimes, fires and other emergency and non-emergency situations.

San Francisco’s 9-1-1 Dispatch Center is one of the top 25 busiest 9-1-1 centers in the United States and receives an average of 3,700 calls each day. It is critical that our Dispatch Center can answer all calls for emergency and non-emergency service quickly. Since 2011, the City has seen an increase in 9-1-1 call volumes. ESER 2020 will provide the necessary funding to renovate the existing facility and expand the emergency operation floor to accommodate a higher number of dispatcher workstations in order to meet the increased demand.
